

# Tiger Machine Company

IN-LINE CHAINER

## TIGER EQUIPMENT SPECIALTY EQUIPMENT

TIGER manufactures the most extensive and flexible line of specialty equipment in the concrete products industry. Our equipment adds value to end products, and/or adds control or technical advantages to the equipment. We provide off-line and in-line systems capable of adding value to your architectural masonry, concrete paving stone units, landscape or hardscape products.

With multiple versions and configurations, and semi-automated to fully automated specialty products handling and manufacturing systems, TIGER can cover all your specialty products needs. TIGER manufactures product tumbling, rumbling, product distressing, and chainer systems. All of these systems are designed to provide an antique look for masonry products that is so coveted by today's architects, builders and consumers. Splitting masonry for a rock-face or striated look is no longer enough. Consumers demand new products and new looks for their finished project. Producers need to make value added products that cover the markets increasing product variety needs and enhance their profitability. A multitude of surface textures can be achieved with TIGER antiquing equipment.

There are many other specialty product options available from TIGER, such as off-line and in-line de-cubers and cubers for use with chainers, tumblers, rumblers, as well as multiple types of splitting, chipping and re-packaging lines. Accessory specialty equipment such as cull pallet ejectors, low, medium and large capacity pallet accumulators, auto-sensing laser sensors, product weight scales, automatic pallet turnovers and pallet cleaners are also available.

**No matter what your needs for specialty equipment are, TIGER has a solution for your project!**
